

Be a part of the

Scientific Student Competition

@Budapest [HU], 10-11 June 2024

What is SSC?

The Scientific Student Competition program is the most broadly based and comprehensive form of talent management, a platform for self-education, elite training to become scientists.

The student scientific conferences in Hungary have a 70-years long history, almost all the top Hungarian scientists and industrial researchers have been involved in this program. Internationalization of the scientific student conferences within the EELISA project is a unique opportunity to bring students together from different universities.

Students are motivated to submit their high-quality entries to showcase their skills and their achievements in front of the best in their research fields.

Aim of the Competition

The Scientific Student Competition aims to encourage student science and art student activity, ensuring challenged-based learning opportunities via research activities. Further aim is to provide assistance in advancing research and encourage to apply for PhD programs.

Organization

The competition is organized in a hybrid way. The highlighted themes will be presented in person during the EELISA Joint WP7 & WP9 Meeting in Budapest, Hungary.

Sessions of the competition will be organized by scientific fields in diverse disciplines. 5-10 studies will be assigned to each sessions.

Application process

Students would present their research work done under the supervision of professors. Register with a short summary of your research work until mid of April 2024. Apply to the competition with a 20-60 pages long research report submitted 3 weeks before the event. Hold a presentation at the symposium in 12-15 minutes.

Awarding process

All research reports will be checked and evaluated by two reviewers before the event and judged by a scientific jury based on the oral presentation. Prizes will be awarded separately in each session. Sponsors and supporters can give extra awards to exceptional candidates.

For more information, contact your supervisor or EELISA coordinator. Register your research summary until 15 April 2024 via bit.ly/eelisa-ssc24. Submit your complete study before 22 May 2024.
